

VACANCY – JUNIOR GEOLOGIST

Koryx Copper Inc., the parent company of Haib Minerals project in Noordoewer, is seeking motivated and detail-orientated Junior Geologists to support exploration programs and ensure accurate geological data collection and reporting. The company is growing and there will be a continued need for qualified and experienced Geologists.

Key Requirements:

- Minimum: BSc (Honours) in Geology or equivalent
- Proficiency in MS Office applications
- Basic knowledge of 2D GIS mapping tools
- Understanding of geological data collection, processing and reporting (Candidates with experienced preferred)
- MINIMUM experience: 2 months Internship at an exploration or mining company

Responsibilities - (Include but are not limited to).

- Monitor and report on drilling, mapping, prospecting, geochemical, and geophysical survey tasks according to work plan and schedule.
- Supervise core yard/warehouse and field station leaders, ensuring safe and effective work execution to meet production and quality targets.
- Ensure proper handling, storage, and maintenance of all geological tools and equipment.
- Ensure that daily production and quality targets are achieved as agreed with supervisors.
- Maintain all documentation and reporting of technical, administrative, and HR activities.
- Capture geological data accurately, and perform 2D/3D interpretation and reporting.
- Ensure compliance with HSE requirements, including identification and control of operational risks.
- Report HSE non-conformances, near misses, incidents, or accidents promptly.
- Promote and support Haib's ESG targets through accurate HSE data reporting.
- Contribute to safe and inclusive work environment by adhering to all company policies.

Core competencies

- Analytical thinking and good observation skills
- Good written and spoken communication skills in English
- Attention to detail and accuracy
- Methodical approach and problem-solving abilities
- Good level of fitness and ability to work in field conditions
- Compliance-focused with awareness of workplace safety protocols

Ideal exposure:

- Strong structural geology expertise.
- Proven ability to communicate complex ideas to junior geologists and non-geologists
- Competent Person accreditation for porphyry copper-style mineralisation and deposits.
- Extensive experience in due diligence and project evaluation.
- Strong focus on hands-on field geology, mapping, and drill core logging, as well as conceptual 3-dimensional modelling.

** Drivers license ideal

How to apply:

If you meet the requirements for this role and are ready to contribute to the success of our company, please apply through our recruitment portal at www.jobopportunities.net.

Closing Date: 24 December @ 7:00PM

Our client is committed to diversity, equity, and inclusion in the workplace. We encourage applications from all qualified candidates, regardless of race, gender, age, religion, or background – including individuals with disabilities and members of underrepresented groups.
